

Did you know!?

Allison's Dance Academy spent the summer re-imagining ways we can teach and we will now be a tech enabled studio. While we still LOVE seeing dancers face to face and plan to continue the majority of our classes in that setting, being a tech enabled studio gives you options and peace of mind.

What Does Tech Enabled Mean?

- Our Brandon and Rock Rapids studios are equipped with large screen TVs so teachers can see students easily from anywhere in the room. Online viewings will also be available for Rock Valley and Beresford students.
- Teachers have been trained to teach online as well as in person and can successfully teach hybrid as well. We have been honing our skills this summer to bring you an even better experience online if needed!

Uninterrupted Service:

- In the event of a Stay at Home Order, we are equipped and ready to switch to online classes in a day's notice if necessary.
- This can give you peace of mind that no matter the circumstance we are prepared to keep our students active and healthy.

Students looking for purely online dance education:

- Our classes will be accessible online. Information is located in your Studio Director account under Class Documents.
- We can also arrange private lessons online.

This is just another way we are working to better serve our dancers and communities!
